Marcin Skiba

Full Stack / Backend Developer · 14 years of commercial experience

marcin@coding.buzz coding.buzz Łask, Poland

PROFILE

Backend-focused full stack developer building production systems for e-commerce, retail loyalty, healthcare and booking platforms. Owns features end to end – from API design and domain modelling to payments, search and deployment – across Node.js/TypeScript, Ruby on Rails, Python/Django and Java.

CORE SKILLS

Backend	Node.js / TypeScript (Koa, NestJS, GraphQL), Ruby on Rails, Python / Django (DRF, Celery), Java (Spring, Java EE)
Frontend	React, TypeScript, HTML5, CSS3 / SCSS
Data & search	PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, RabbitMQ
Integrations	Magento, Spree, SAP Hybris, payment gateways (Stripe, PayU, Przelewy24, BLIK, Apple / Google Pay), OAuth / social login, push notifications
DevOps	Docker, GitLab CI/CD, Capistrano, Google Cloud, AWS S3, Datadog, Trivy

EXPERIENCE

Full Stack Developer – goodylabs sp. z o.o. 01.2014 – present

Software house, Łódź. Joined as a Java EE / SAP Hybris and frontend developer; now backend owner on long-running client projects.

Omnichannel e-commerce & loyalty platform – major sportswear retailer 2020 – present

- Core developer of the Node.js backend over Magento: cart, checkout, BLIK / Apple Pay / Google Pay, subscriptions and multi-language support.
- Built Elasticsearch product indexing with faceted filtering and per-country availability.
- Developed the loyalty API (coupons, cashback, bonus-point promotions, push notifications) and the in-store kiosk API.
- Currently building a TypeScript service that processes order events from a central Transaction Hub.

Node.js · TypeScript · Koa · MongoDB · Redis · Elasticsearch · GraphQL · React · GCP · Docker

Public-health mobile app backend – private healthcare provider 2024 – present

- Main backend developer of the Django REST API for a city health-challenge app with yearly editions and daily content.

Python · Django · DRF · PostgreSQL · Celery · Redis · Firebase · Google Cloud

Room-booking platform – rehearsal and dance studio network 2020 – 2025

- Developed and maintained the original Node.js platform: bookings, invoicing and payment integrations.
- When the business expanded to multiple markets, designed and built its replacement in Rails 8 from scratch – bookings, schedules and time zones, orders, token wallet, premium packages and migration from the legacy system.

Node.js · Koa · MongoDB · Ruby on Rails 8 · Stripe · RSpec

Selected other projects

- **Business news app for a London financial PR consultancy:** backend API for the mobile app and a separate push-notification management API, maintained over several years.
- **International jewellery e-commerce (SAP Hybris):** storefront frontend with a product configurator for designing jewellery at purchase.
- **Headless e-commerce for a fashion brand:** complete Spree storefront API – cart, checkout, payments and social sign-in.
- **NestJS GraphQL microservice:** architecture, JWT auth and E2E test suite.
- Also: Rails platforms for music licensing, sports retail and B2B distribution; Java systems for card management and telecom identity.

EARLIER EXPERIENCE

Independent Software Developer – Coding Buzz (sole proprietorship) 08.2015 – present
Full Stack Developer – Creality sp. z o.o. 01.2016 – 01.2019
Full Stack Developer – FiveDotTwelve sp. z o.o. 02.2017 – 09.2017
Full Stack Developer – Outbox sp. z o.o. 08.2015 – 12.2015
Java EE Programmer – Comarch S.A., Łódź 10.2012 – 01.2014
Preceded by a summer internship as Programmer and Algorithm Designer (07–09.2012)

EDUCATION

BSc in Informatics – Lodz University of Technology 2010 – 2013
Faculty of Technical Physics, Information Technology and Applied Mathematics · Software Engineering and Data Analysis

LANGUAGES & INTERESTS

Polish – native · **English** – fluent (B2 certificate)

AI, mathematics, playing guitar, cycling, magic and illusion, board and role-playing games.

I hereby consent to the processing of my personal data for the purposes of the recruitment process in accordance with Regulation (EU) 2016/679 (GDPR).
